

Bary Williams, Au.D.

DOCTOR OF AUDIOLOGY

Dr. Bary Williams developed the Adriatica Audiology and Hearing Centers' patient journey with a comprehensive, focused approach towards making the experience unique and simple to grasp.

Perhaps no one understands hearing and speech issues better than someone that's struggled and overcome a communicative handicap himself. Dr. Williams was born with a hearing and speech handicap, and has been a student of the industry for over 40 years and counting.

Hearing is so vital to a healthy, active lifestyle. Recent studies have shown that hearing loss has been linked to the onset of dementia and Alzheimer's, depression, diabetes, and cardiovascular disease. Adriatica Audiology's system has been an award winning, life-changing audiology center for almost a decade now in McKinney, Plano, and Garland. It teaches people not only how to avoid the consequences of untreated hearing loss, but even more importantly, it presents a precise and easily attainable blueprint for success in communicative and interpersonal relationships, which often are damaged by the stress of simple communication failures inherent in ignoring one's hearing problems.

Hearing is so vital to an active and healthy lifestyle, and a great quality of life. Dr. Williams encourages you to call Adriatica Audiology today, and set up your complimentary appointment to listen and learn about the wide range of choices available.
